Technical Projects

MIDI PIANO VISUALIZER

- Built a macOS app in Swift to visualize MIDI input from a MIDI controller as a keyboard interface
- Designed app to assist music tutorials by displaying real-time key and pedal presses
- Implemented note tracking via MIDI protocols

RELATIONAL DATABASE BOOK TRADING PLATFORM

- Collaboratively developed an online platform for the exchange of books.
- Created an analytics tab and report of vital metrics that gave information on listings and prices.
- Utilized MariaDB to design CRUD operations for data handling.
- Utilized relational database modeling for the data architecture of Tradespace.

DIGITAL STOREFRONT

- Launched and managed an online storefront, with buyers in Australia.
- Marketed and designed ad creatives for use in Facebook paid ad campaigns.
- Coordinated with suppliers in China to arrange shipment of products to customers.

Experience

CHICK-FIL-A

Bakersfield, CA

Team Member

June 2023 – Present

- Served over 80+ customers daily. Handled guest interactions and conflict resolution to fulfill orders accurately.
- Promoted Chick-fil-A's values through hospitality and maintaining a welcoming demeanor with repeat guests.
- Accurately completed food orders within 2-4 minutes through collaboration with team members and adherence to food safety standards.
